

AMERICAN LIFE LEAGUE'S  
**CULTURE OF LIFE  
STUDIES PROGRAM**

# Endorsements

Take a look at what pro-life leaders, teachers, and parents are saying about the Culture of Life Studies Program.

In order to establish a culture of life, it is essential that children be educated, from their earliest years, to know the truths about the gift of life, of marriage, and of the family so that they can become adults who will embrace the culture of life in all their thinking and in all aspects of their daily living. The Culture of Life Studies Program of the American Life League provides an excellent program to teach children, from their very earliest years through their teens, in an age-appropriate, consistent and systematic way, to understand and embrace the culture of life.

I am happy to recommend the Culture of Life Studies Program for use in the home, in schools, and in other programs.

—Cardinal Raymond Burke, Patron of the Sovereign Military Order of Malta

American Life League's *Miracle of Life Coloring & Activity Book* is a wonderful way to instill a strong and consistent pro-life message into the children of this generation. The life-affirming topics tackled in this book are simple enough for a child to understand, yet profound in their impact! Being pro-life starts at home, and what better way to teach our children the value of life than to sit down and color with them

—Abby Johnson, mother of five and founder of *And Then There Were None*

Your *Euthanasia: An Introduction* was excellent! I can't express to you enough how much this is needed throughout our entire education system. As you indicated, so much of what the other side is teaching/promoting is taking hold and impacting our nation (really worldwide) in a profoundly destructive way.

—Bobby Schindler, president, Terri Schiavo Life & Hope Network

When we produced *Crescendo*, our goal was to make a film that was a monument to the incomparable dignity of the child in the womb. But what's more important is communicating the incomparable dignity of the human person to our own children. That is why I feel so blessed to see that our film is a part of the Culture of Life Studies Program and will be teaching children in our country their dignity and their worth.

— Jason Jones, producer of *Crescendo* and former ALL youth outreach director

CULTUREOFLIFESTUDIES.COM

*The Miracle of Life Coloring & Activity Book* is a great way to inspire children with something that touches their hearts deeply—the wonder of little babies and their mothers and fathers! The fun pictures inspire the imagination, and the captions will spark a conversation about the uniqueness of each human person in God’s plan for the salvation of the world. Through these simple pages you can make a profound impact in the souls of the children whom God has given you to care for and nurture.

— Ken Davison, founder of Holy Heroes

*The Miracle of Life Coloring & Activity Book* is the perfect tool to help teach even our youngest children about the precious gift of all human beings. Filled with creative puzzles, coloring activities and interactive themes, this fun hands-on approach covers all spectrums of the pro-life message, offers saintly wisdom from Saint John Paul II and Blessed Mother Teresa and other champions for life. Fun, faith-filled and a great gift for any family!

— Lisa M. Hendey, founder of CatholicMom.com and author of *The Grace of Yes*

Your *Life Is Precious* unit study beautifully engages the student in drawing out the depths of these delightful books. What begins as an enjoyable read-aloud transforms into an insightful discussion through the medium of step-by-step crafts—which are supercute! The easy-to-follow format is a welcome relief to us busy homeschooling moms.

—Alyssa Hichborn, homeschooling mom of 5

This *Euthanasia* lesson is very well organized and presented. Providing foundational Church documents (i.e., *Evangelium Vitae* and the *Catechism*) is a great way to start and equips students with the clearly stated position of the Church. The discussion questions are rigorous, right on point, and challenge the students to understand that deciding when human life begins and ends is God’s purview, not man’s. Well done!!!

—Tim Hamer, former principal of Saint Michael the Archangel High School, Fredericksburg, Virginia

Thank you, American Life League, for creating this important program! We called to order one copy of *Life is Precious* and, after giving it to a local kindergarten teacher, we decided to order two more. The teacher used the fetal development section with her class just before Mother’s Day and was so pleased she wanted to keep it to use again in the future. We look forward to sharing it with more schools in our area!

—Carol Newman and Diane Zirbel, Door County Right to Life

I received my Culture of Life Program today and I LOVE it. It is so awesome! I’ve moderated a Culture of Life Club for 6th and 7th grade students at our local Catholic grade school for six years now. Last year, I started one for 4th & 5th grades. This book is going to help with the clubs and possibly in starting one for younger students. Thank you so much!!

—Natasia Kissinger, mom of 6, former grade school teacher, Culture of Life Coordinator for her parish and Culture of Life Club moderator
